

Different Size and Colored Options: For Pinch Valves

Fluid Line Technology is proud to announce our seven (7) different colored bonnets for our *Pinch Valves*. Each of our six (6) different size valves have seven (7) colors to choose from. This allows our customers to have the maximum advantage possible for designing safety, efficiency, and reliability into their product lines, all while having the most efficient valve type in the correct location.

Current handle colors used by our customers to improve safety and efficiency:

- Steam Lines (red), Condensate Lines (black), Water Lines (blue), Harmful Chemical Lines (yellow) or Product Lines (green).

Other potential uses:

- Maintenance benefits: Handle color changes when valve seals have been replaced.
 - Allows for fast and direct ability to verify all valves have been properly maintained.
- Production benefits: Handle color changes for every facility.
 - Allows for designating quickly which valve belongs in what facility/building.
